**Seating is limited so please RSVP. You do not need to be a patient to attend, friends are welcome. To RSVP please call the office at 623-643-9598.**

## September is Hair Loss Awareness Month

~Dr. Carla Briante, NMD

Alopecia is partial or complete absence of hair from areas where it normally grows. Hair loss for most people can be pretty devastating. Hair loss can occur for several reasons:

- Chemical exposures
- Medications
- Physical stress
- Poor nutrition
- Autoimmune condition
- Low thyroid
- Inflammatory disorders
- Pregnancy
- Psychological stressors
- Food allergies
- Hormone imbalances
- Low iron

Traditional treatment options for hair loss include prescriptions like minoxidil, finasteride, steroids, or surgical transplantation. However, since there are a variety of causes for hair loss, a comprehensive evaluation is warranted to determine the underlying cause.

For example, thinning hair is a common symptom of low thyroid function, so by successfully treating thyroid function hair re-growth is possible. Since the hair cycle is relatively long, it can take several months for hair regrowth to occur.

One of my favorite alopecia treatments is Platelet Rich Plasma (PRP) for Hair Restoration. With this treatment, your platelets, rich in growth factors, are used to stimulate hair follicles to increase hair thickness and grow new hair the areas of hair loss or thinning.

PRP for Hair Restoration is a very safe and effective procedure. Generally 1-3 treatments are needed once per month to see results. To learn more about PRP for Hair Restoration you can schedule a **15 minute free Meet & Greet** or your Initial 60 minute consultation with Dr. Briante.

### Monthly Supplement

---

For the next 30 days we will be offering 15% off of our **homeopathic immune booster injection**. This injection is great as a flu shot alternative for those who have an egg allergy or for those who just

do not want a flu shot.

We generally recommend getting a booster once a month for those who have a lot of exposure to people or children to help ward off any colds or the flu. Because it is homeopathic it is safe for all ages no matter what the person's immune status and will NOT interfere with any medications. You do not need to be a patient to receive this injection.

### Medical Aesthetics Procedures

---

West Valley Naturopathic Medicine is now offering **Medical Aesthetics Procedures**. To book an appointment with Dr. Briante for a **PRP Vampire Facial or PRP for Hair Restoration**, please call the office at 623-643-9598.
